

About Us

Sentinel Gradient LLC evaluates, builds, and hardens machine learning systems with transparent methodologies, evidence-driven benchmarks, and safeguards that scale from laboratory prototypes to operational deployments. We align research with critical domains spanning autonomy assurance, LLM reliability, and mission-grade analytics to ensure every model decision is interrogable and defensible.

Core Competencies

- Artificial intelligence and machine learning engineering
- Advanced algorithm development and computational modeling
- Predictive analytics and data-driven decision support
- Systems engineering and intelligent software prototyping
- Applied research and development (R&D) for emerging technologies
- Rapid prototyping and agile solution deployment
- Technical advisory services for complex technology programs
- Model evaluation, testing, and performance verification
- Technology integration and interoperability support
- Data engineering, pipeline development, and workflow automation
- Capability gap analysis and mission-focused solution design

Point of Contact

Bhavya Rahul Johar, CEO
info@sentinelgradient.com
571-320-8885

Differentiators

- Deep technical expertise in modern AI/ML, computational science, and algorithm engineering.
- Agile, research-driven development enabling rapid prototyping and iteration for mission-critical applications.
- Emerging HUBZone-eligible principal office (Charlottesville, VA), strengthening socioeconomic value for agencies

Certifications

Federal: HUBZone, Small Business, Minority-Owned Business (Subcontinent Asian)

Vehicles: Open to subcontracting and teaming opportunities Eligible for Simplified Acquisition Procedures (SAP) Eligible for micro-purchase and small business set-asides Preparing for GSA Schedule consideration

Corporate Data

Sentinel Gradient

218 14th St NW, Charlottesville, VA, 22903

UEI: LZQMAV479P59

CAGE: 178C5

NAICS Codes:

Primary: 541511 – Custom Computer Programming Services

Secondary: 541512 – Computer Systems Design Services
